DETAILED ACTION

Response to AF Arguments

- 1. This action is in response to the communication filed on 4/20/05.
- 2. Claims 1-47 are pending in this action.
- 3. This is an advisory Action.

Remarks:

Regarding claims 1-47, applicant presents some arguments which examiner finds necessary to respond to.

Regarding claim 1, applicant argues by saying "Kito fails to teach or suggest "a routing unit for determining whether the first terminal unit is to communicate with the second terminal unit via the first or second base stations in dependence on factors that include quality of at least part of the first and second routes", as expressly recited in independent claim 1." But, examiner submits that the APA (see fig. 1 and background section) teaches a mobile communication system utilizing a handover technique wherein a mobile terminal can communicate with another terminal (first terminal) via a first base station (old base station) or a second base station (new base station) wherein the mobile network includes both landline route and wireless route for routing a call. As stated in the body of the rejection, the differences between the APA and the features of claim 1 are one, determining whether the first terminal is to be communicated with the

Application/Control Number: 10/009,215

Art Unit: 2683

second terminal unit via the first or second base station, which is taught by Kito (US 6,263,207 B1). Kito teaches that base station of a mobile station can be changed (see col. 3, lines 50-58). In other words, a mobile station can be caused to attach itself to a first or second base station, via the control of the exchange (fig. 1, element 11), which can be considered as being able to make routing decisions. Second, again as stated above, in the body of the rejection of the claims, the APA in view of Kito does not explicitly teach about factors that include quality of at least part of the first and second routes, a feature is which is taught by Strawczynski et al. (US 6,038,452) (see entire document, particularly, col. 5, lines 1-58; col. 8, line 53-col. 9, line 7; col. 10, lines 40-44). Besides, adjusting link parameters, Strawczynski et al. teaches link/path selection based on quality. Hence, examiner is of the opinion that the arguments are not persuasive. Applicant also raises another argument regarding claim 11, by saying "Goilbert fails to teach what APA, Kito and Strawczynski lack" in that he "fails to teach or suggest "determining whether the first terminal unit is to communicate with the second terminal unit via the first or second base station independence on factors that include the quality", as recited in independence claim 11. Examiner submits that Gilbert's reference is used to address the "estimating" feature in claim 11. But, applicant's argument against the reference of Gilbert seems to be no difference from the argument provided in claim 1. In that, the use of Gilbert in the rejection is to teach "estimating the quality of at least part of the first and second routes/links", as can be seen above. Applicant's argument regarding claim 11, is not directed to this feature. However, examiner believes that Gilbert teaches about estimating quality of a route/link as

Application/Control Number: 10/009,215

Art Unit: 2683

discussed in the body of the rejection above. Hence, this argument too is found not to

Page 4

be persuasive.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Meless N Zewdu whose telephone number is (571) 272-

7873. The examiner can normally be reached on 8:30 am to 5:00 pm..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, William Trost can be reached on (571) 272-7872. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
